Real Estate Settlement
Solutions For The Future
Simple, Powerful, Marketing Tools
For Any Size Company!

888-744-0007 ext 1

www.PagestreamLive.com

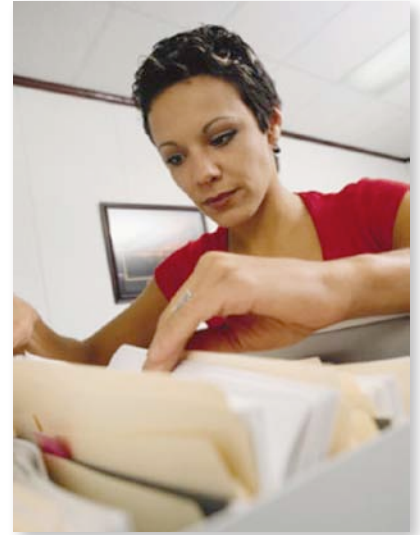

PagestreamLive, a leader in digital services & solutions for the Real-Estate market provides powerful browser based solution that:

- Creates Live electronic files for your New Title Transactions and eliminates the paper!
- Provides a Un-editable, online digital Archive for older and newer closed files!
- Provides 21st Century Marketing Tools for increasing your bottom line!
- Customer Service Specialist assigned to each new client for the first 6 months to help manage your new Transaction Management System.
- Audit Trail – Every activity type is monitored by the system. You the Agent or Attorney can walk in every morning and view activity log's to see who has done what! Internally as well as externally.
- No cost solution to the Agent or Attorney, a legitimate HUD based pass through because both the buyer and seller directly benefit from the service while the transaction is in progress and get final documents electronically.

Our Company

Who we are:

PagestreamLive is a company whose mission is to help title agents and attorneys get the most out of every closing they do. To accomplish this we use our innovative software to enhance every transaction. Our management team has many years of experience in the title insurance business and the document management industries.

Live Transaction Management With Read-only Archive

Marketing Assistance:

We Are There Every Step Of The Way!

Our innovative software lets you market to all parties to your transactions with the click of a button. Promote & manage any event happening at your office. We help you locate email HTML campaigns to send to your customers. Track the source of your business in real time for marketing your already existing customer base! We help you connect to new customers from Facebook, Twitter and other social media sites.

TRANSACTION MANAGEMENT

PagestreamLive Transaction Management Suite allows you to open electronic file folders for your transactions. With each folder, you can add documents, track the status of the transaction, give parties online access to the transaction, and more.

The Title Connect App allows the export of your transaction data to PagestreamLive. Title Connect can be configured to work with any title production software. The numerous apps in the Transaction Management Suite work together in a seamless fashion.

Applications Available within the Transaction Management Suite		Included in Suite

Document Scanning Services For Your Older Back Files

- Pick up documents at your office or facility
- Inventory
- Prepare
- Capture
- Store
- 'Online Retrieval'
- Give archive quality copies of
- Secure destruction of the paper
- Unlimited support
- All in one pricing together with your new Transaction Management System!

Installation & Integration:

We build a web page for all parties to access the backend software. This page is built with your logo and information for your clients to access live files being processed for closing. You will assign rights and permissions to which areas and what each participant can access with our help!

Objectives

We have four benchmarks for our service:

- It must be cost effective
- It must be non-evasive
- It must create immediate and identifiable benefits
- It must be reliable

Uniqueness

Converting millions of paper documents each month to digital documents and making them available over the world wide web is no simple task. Doing it efficiently, without the requirement of additional software or hardware is even more difficult. We make the impossible, possible and the difficult appear easy.

We created the software, processes and procedures to accomplish this. Because of our high level of expertise in storage and retrieval techniques, we are also considered a 'document authentication' company.

Questions and Answers

How do I contact your company?

For Sales/Service/Support
888-744-0007 ext 1
Local 571-379-8758

sales@pagestreamlive.com

www.PagestreamLive.com

How much is your service?

For most industries we offer a fixed price per file. This allows our client to share the cost of storage with third parties. Charge as part of your closing right on the settlement statement or add to your retainer fee.

Is there a set-up fee?

Yes. A one time \$500 Fee.

Do I need special software or hardware to use the system?

No, just an internet connection and some training, you are on your way.

Is online document retrieval safe?

Yes, we use our secure portal and encryption similar to online banking to deliver the system to you.

Do I receive a copy of my documents?

Yes, you receive an online web cabinet of your closing files in an un-editable digital archive.

Can I view, print, fax or e-mail the images?

Yes . . . and much, much more.

Where are my digital documents stored?

Unlike the way your paper documents are stored, we store your digital documents on our servers in a tier five co-location known as Peak 10 Inc. They provide safety from all natural disasters and power outages that can happen. Check them out at www.peak10.com.

Is there a long term contract?

No. A 1 year commitment is all we ask.

Back File Scanning Service as Part of Your New Transaction Management System

Here are some of the many problems we have solved for the Title Settlement industry.

Immediate File Access

QC: You forgot and left a tax check in the file.

Anytime documents such as; checks, unrecorded deeds and other valuable items are found, they are promptly returned. We find a lot of checks.

Different size documents: What about the post-its in my file? Each document is reproduced with the exact same dimensions as the original, regardless of its size. Even post-its are scanned.

Fees: Most agents place our fee on the HUD as a third party pass through. Having all parties share the cost of archiving spreads the cost fairly. And now you'll be able to e-mail your customer everything they lost in less than 3 minutes, even on Friday.

E-mail: Nothing is more frustrating than receiving an e-mail you can't open. We solved that. You send it, their browser opens it.

"Six Months of Free" Customer Support: We assign a customer support specialist to your account for your staff and clients to help integrate all the great features the system has to offer. They will be available Monday thru Friday 9:00 am to 5:00 pm via email and telephone. *Their priority is helping you!*
